NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Luis Lemus

Email Address: luislemus3@hotmail.com

Comments: Please do not fight for repeal of NEPA. The environment merits all the protections afforded by the law, even if it creates roadblocks and hurdles to development. By the same token, I believe firmly that this president and the

US government should take a leadership role in the Earth Summit II; specifically

forcing industry to meet more stringent pollution standards, cars and energy consuming devices to be less petroleum through incentives and in general conserve the planets natural resources. It's the only one we have and we should

leave it in the best condition possible for our heirs. Thank you.
